

Item	Item Description	Priority (Criticality)	Rationale	Author
Account	1 The user shall login to the system with the following credentials: 1.1 - username 1.2 - password	1	1 A login will allow users to access their past progress 1 A username is important so users can easily identify each other 1 A password is important to protect the users account and information	1 A login will allow users to access their past progress 1 A username is important so users can easily identify each other 1 A password is important to protect the users account and information
	2 The user shall create an account with the following credentials: (* required) - username (Between 8 and 20 characters, no special characters for first letter... [list of valid 21 characters]) 2.2 - password (...) * 2.3 - date of birth * 2.4 - email (*) *	1	1 Account creation is essential for accessing much of the online interaction on the app 1 *Name as 2.1 1 *Name as 2.2 3 Can be used to verify age 1 Task usernames and passwords to a user's specific email, in case they forget a username or password	1 Account creation is essential for accessing much of the online interaction on the app 1 *Name as 2.1 1 *Name as 2.2 3 Can be used to verify age 1 Task usernames and passwords to a user's specific email, in case they forget a username or password
	3 The user shall view their daily streak.	2	2 Gamifies the platform to encourage users to participate consistently	2 Gamifies the platform to encourage users to participate consistently
	4 Accounts visibility shall be made public or private	2	2 If the user wants to "increase" their privacy then they can keep their profile private	2 If the user wants to "increase" their privacy then they can keep their profile private
	5 Users can reset their password using a "Forgot password"	3	3 In case the user forgets their password they can reset it	3 In case the user forgets their password they can reset it
	5 The user can reset their Username using a "Forgot Username"	3	3 In case the user forgets their username they can reset it	3 In case the user forgets their username they can reset it
	5.1 - *Forgot password button sends reset link to users email	3	3 Uses email to prevent users from losing their accounts with the email they have connected	3 Uses email to prevent users from losing their accounts with the email they have connected
	5.2 - *Forgot Username button sends a reset link to user email	3	3 Uses email to prevent users from losing their accounts with the email they have connected	3 Uses email to prevent users from losing their accounts with the email they have connected
	6 Permission levels for accounts	1	1 Having various permission levels will limit or broaden the capabilities of the user.	1 Having various permission levels will limit or broaden the capabilities of the user.
	6.1 - Student	1	1 *Students should be able to have access to most features, but editor features should be limited to prevent troublemakers.	1 *Students should be able to have access to most features, but editor features should be limited to prevent troublemakers.
6.2 - Editor	1	1 Helps ease the workload of developers to expand the platform's question database better	1 Helps ease the workload of developers to expand the platform's question database better	
6.3 - Admin	1	1 Helps ease the workload of developers to not only expand the amount of questions, but to moderate and prevent wrong answers	1 Helps ease the workload of developers to not only expand the amount of questions, but to moderate and prevent wrong answers	
Student	7 The student should have access to the following information 7.1 - completed questions 7.2 - A streak/count of how many days they've answered at least one question 7.3 - badges based on completed goals and milestones	1	1 Defines the various features students will have access to 2 Allows users to organize and better keep track of their progress. 2 To motivate the user into coming back onto the site and practicing more. 3 So the user can have achievements that they can track and feel proud of	1 Defines the various features students will have access to 2 Allows users to organize and better keep track of their progress. 2 To motivate the user into coming back onto the site and practicing more. 3 So the user can have achievements that they can track and feel proud of
	8 The user shall label there solutions as correct or incorrect.	2	2 This will allow the system to track whether the user has done a problem right or wrong based off self report	2 This will allow the system to track whether the user has done a problem right or wrong based off self report
	8 The user shall be able to flag question by using Refer to SAVESCREEN	1	1 This will allow the users to come back later to interesting or difficult problems they find.	1 This will allow the users to come back later to interesting or difficult problems they find.
Editor	10 The editor user shall add a question. Ref to req...	1	1 This will allow for good questions to be made by creditable people. Without us having to make every question	1 This will allow for good questions to be made by creditable people. Without us having to make every question
	11 Ability to provide feedback on student answers for their own questions	2	2 This will allow for the editor to help people find the proper solution to their own questions	2 This will allow for the editor to help people find the proper solution to their own questions
Admin	12 Admin abilities shall include the following 12.1 - Approve permissions for editors 12.2 - Remove questions	1	1 Defines the various features admins will have access to in addition to those under them. 1 Removes work on the admin's end to moderate 2 If a question is inappropriate or "lacking" in substance. It can be removed	1 Defines the various features admins will have access to in addition to those under them. 1 Removes work on the admin's end to moderate 2 If a question is inappropriate or "lacking" in substance. It can be removed
	12.3 - Email Ban Admin	2	2 This was made in case some people decide to "grief" the website or is deemed "inappropriate" for its userbase along with being able to ban hackers and people with nefarious intentions	2 This was made in case some people decide to "grief" the website or is deemed "inappropriate" for its userbase along with being able to ban hackers and people with nefarious intentions
Question	13 The editor shall make a question containing the following information 13.1 - name * 13.2 - a list of 1 or more tags Refer to Filter Page for valid tags 13.3 - 1 or more hints 13.4 - a difficulty 13.5 - a goal time 13.6 - question content	1	1 The questions should have identifying qualities so they are easily searchable 1 A name should be provided so the questions are easily identifiable 2 Tags will allow for questions to be easily sorted and filtered 2 Hints help the user continue attempting the questions without having to reveal the answer 2 Difficulty will allow users to choose questions based on their personal skill and comfort levels 3 Goal times will help users track their progress and determine what areas they need to work on further	1 The questions should have identifying qualities so they are easily searchable 1 A name should be provided so the questions are easily identifiable 2 Tags will allow for questions to be easily sorted and filtered 2 Hints help the user continue attempting the questions without having to reveal the answer 2 Difficulty will allow users to choose questions based on their personal skill and comfort levels 3 Goal times will help users track their progress and determine what areas they need to work on further
	14 Question library allowing modifications by admin	1	1 Make it easier for admin to view and edit questions	1 Make it easier for admin to view and edit questions
	15 Question types include 15.1 - Behavioral* 15.2 - Technical* 15.3 - Conceptual	1	1 Having multiple question types is important so users can practice in multiple areas 1 Its important for users to practice behavioral questions because companies will use these types of questions to predict if employees future performance. 1 Technical questions are important so companies know an employee is comfortable with the tasks they will be completing 1 Conceptual questions are important so companies know that the employee understands the material they use to complete tasks	1 Having multiple question types is important so users can practice in multiple areas 1 Its important for users to practice behavioral questions because companies will use these types of questions to predict if employees future performance. 1 Technical questions are important so companies know an employee is comfortable with the tasks they will be completing 1 Conceptual questions are important so companies know that the employee understands the material they use to complete tasks
	16 Questions are approved by admin before being uploaded	2	2 Questions being approved by admin beforehand is helpful to ensure that the questions being provided to students are quality	2 Questions being approved by admin beforehand is helpful to ensure that the questions being provided to students are quality
	17 Users are able to search questions by course number or specific tags	2	2 This is helpful in making sure users can easily find questions	2 This is helpful in making sure users can easily find questions
	18 Supports both timed and untimed questions	1	1 Having both timed and untimed questions is beneficial so users can practice under different levels of pressure	1 Having both timed and untimed questions is beneficial so users can practice under different levels of pressure
	18.1 - User selects an "Interview" mode which automatically applies time limit	3	3 Having it labeled as interview mode helps users understand that there will be limited time during a real interview	3 Having it labeled as interview mode helps users understand that there will be limited time during a real interview
	19 The editor shall be able to make a link related to there question			
	Filters			
	20	The user shall filter the list of questions by: 20.1 - Course Number 20.2 - Difficulty 20.3 - Companies 20.4 - Language	2	2 Allowing the user to filter questions will enable them to select questions that best suits their needs. 2 If the user wants to interview for a company that specializes in law instead of coding or IT, the user can change course numbers so they can get relevant questions for their interview. 2 If the user wants to "pace" themselves they can choose the medium difficulty and once the user has understood all the medium difficulty questions, the user can then move on to the hard difficulty questions and master those. It will have 3 difficulties: easy, medium, hard
20.5 - Type (Refer to Question Types)		2	2 The user can sort through the list to select the company so they can get a more "personalized" question list for the interview that will be relevant to them, for example if the user is interviewing for a FAANG (Facebook, Amazon, Apple, Netflix, Google) company. 2 The users should be able to upload a variety of programming languages allowing for diverse questions in many fields 2 If the user wants to "fine-tune" their interview question types they can sort it through Behavioral, Technical, and Conceptual so they can perform better on the interview.	2 The user can sort through the list to select the company so they can get a more "personalized" question list for the interview that will be relevant to them, for example if the user is interviewing for a FAANG (Facebook, Amazon, Apple, Netflix, Google) company. 2 The users should be able to upload a variety of programming languages allowing for diverse questions in many fields 2 If the user wants to "fine-tune" their interview question types they can sort it through Behavioral, Technical, and Conceptual so they can perform better on the interview.
Solution	21 The user shall view the list of solutions for a question 22 The user shall either approve or disapprove of a solution 23 Help center for students to request help and report issues with questions	2	2 The user can do this to see how the question can "vary" with the right answers and understand the nuance in correct answers and how the question can be approached. 2 The user can like or dislike a solution so that the community can decided if a solution is good or not 3 In case the user notices an error with a question or they are confused on a question and can't find the answer out.	2 The user can do this to see how the question can "vary" with the right answers and understand the nuance in correct answers and how the question can be approached. 2 The user can like or dislike a solution so that the community can decided if a solution is good or not 3 In case the user notices an error with a question or they are confused on a question and can't find the answer out.
	24 The system shall display solutions in order of most approved.	2	2 This will help the user find the most reliable solutions.	2 This will help the user find the most reliable solutions.
Saved Questions / Solutions				
25	The user shall be able to filter previously seen questions or answers, by the following criteria 25.1 - general filtering criteria Refer to... 25.2 - Flagged or Not Flagged Refer to...	2	2 This will help users find previously seen questions or answers based off some criteria 2 This will just apply the general rules of filtering we already have to this system 2 This is how they mark questions that they would like to be able to look back on	2 This will help users find previously seen questions or answers based off some criteria 2 This will just apply the general rules of filtering we already have to this system 2 This is how they mark questions that they would like to be able to look back on
Community Interactions				
26	The user shall be able to comment on a question 27 The user shall be able to see comments on a question 28 The user shall be able to comment on solutions 29 The user shall be able to see comments on solutions 30 The user shall either approve or disapprove of a comment	2	2 The user can do this to seek help with the community, or just give hints 2 This gives along side posting a comment on a question they can also see other peoples comments 2 This applies the last 2 but now with solutions instead of questions 2 AAA
